

CV Report for Job: Convex Developer

Score: 30/100

Analysis

The candidate demonstrates some experience in web development with frameworks like Angular, Node.js, and Spring Boot. However, there is no mention of experience with Convex, which is a crucial requirement for this role. The CV highlights skills in various technologies, but lacks specific examples demonstrating proficiency in areas relevant to Convex development. The experience level is also not a match for the job requirement of a master's level developer.

Insights

Experience with Angular and Node.js shows transferable skills that could be relevant to learning Convex.

The candidate demonstrates a proactive approach to learning and professional development, evidenced by their freelance work and multiple internships.

Strong background in web application development which might be adaptable to Convex's architecture.

Weaknesses

No experience with Convex or similar technologies. This is a major drawback for this specific role.

The CV lacks quantifiable achievements and specific examples of projects. It primarily lists technologies and doesn't show the impact of the candidate's work.

The experience level stated in the CV doesn't meet the job's requirement for a master's level developer.
