

CV Report for Job: Convex Developer

Score: 60/100

Analysis

The candidate demonstrates experience in web development using various frameworks like Angular, Node.js, and Spring Boot. However, there is no explicit mention of experience with Convex, which is a crucial requirement for this role. The candidate's skills in other areas are relevant to software development in general, but their direct applicability to Convex development needs further clarification.

Insights

Strong background in web development with experience in Angular, Node.js, and Spring Boot, demonstrating proficiency in front-end and back-end technologies.
Proven experience in project management using tools like Jira and Trello.
Experience with various databases (SQL, MySQL, PostgreSQL, MongoDB), showing adaptability to different data storage solutions.

Weaknesses

Lack of explicit experience with Convex. The job description specifically requires Convex development experience, and this is missing from the CV.
The CV is in French, which may pose a communication barrier depending on the company's language preferences. An English version is highly recommended.
The CV lacks quantifiable achievements. Adding numbers to illustrate the impact of previous projects would strengthen the application.

Skills

Angular	
Node.js	
Spring Boot	
React	
Symphony	
SQL/MySQL/PostgreSQL	
MongoDB	
Git/GitHub	
Jira/Trello
