

CV Report for Job: Convex Developer

Score: 40/100

Analysis

The candidate demonstrates experience in web development with various frameworks (Angular, Node.js, Spring Boot) and databases (MySQL, PostgreSQL, MongoDB). However, the CV lacks any mention of experience with Convex, which is a crucial requirement for the job. The candidate's projects show proficiency in building web applications, but there's no evidence of experience with serverless functions or the specific technologies used in Convex development.

Insights

Strong background in web development using popular frameworks like Angular, Node.js, and Spring Boot.

Demonstrated experience in project management using tools like Jira and Trello.

Proficiency in multiple database systems (SQL, MySQL, PostgreSQL, MongoDB).

Weaknesses

No experience with Convex framework – This is a major drawback given the job description.

Lack of demonstrable experience with serverless functions or related technologies commonly used with Convex.

CV is in French, which may present a communication barrier depending on the company's language preference.
