

CV Report for Job: Convex Developer

Score: 60/100

Analysis

The candidate demonstrates experience in web development with various frameworks (Angular, Node.js, Spring Boot) and databases (MySQL, PostgreSQL, MongoDB). However, the CV lacks explicit mention of experience with Convex.js, the core requirement for this role. The candidate's experience is primarily focused on frontend and backend development, but lacks demonstrable expertise in the specific skills needed for a Convex developer position. The strong academic background and diverse project experience are positive attributes.

Insights

Strong foundation in web development demonstrated through multiple projects and internships.
Proficiency in several relevant JavaScript frameworks (Angular, Node.js).
Experience with various databases showcasing adaptability.

Weaknesses

No direct experience with Convex.js or similar serverless technologies. This is a major weakness for this specific role.
The CV is in French, which may pose a communication barrier depending on the company's language preference. An English version would be beneficial.
The CV lacks quantifiable results. Instead of simply listing tasks, it should highlight the impact of the candidate's contributions (e.g., "Improved website load time by 20%").

Skills

Angular	
Node.js	
Spring Boot	
MySQL	
PostgreSQL	
MongoDB	
Convex.js	
Git
