

CV Report for Job: Convex Developer

Score: 60/100

Analysis

The candidate demonstrates experience in web development with various frameworks (Angular, Node.js, Spring Boot), database management (SQL, MySQL, PostgreSQL, MongoDB), and project management tools (Jira, Trello, Git). However, there is no explicit mention of experience with Convex, which is a crucial requirement for this role. The candidate's experience is primarily focused on front-end and back-end development using Javascript and related frameworks; this is relevant, but the lack of Convex experience is a significant drawback.

Insights

Strong experience in web development using popular frameworks like Angular, Node.js, and Spring Boot.
 Demonstrated proficiency in various database management systems (SQL, MySQL, PostgreSQL, MongoDB).
 Experience with project management tools like Jira and Trello showcases organizational skills.

Weaknesses

No experience with Convex is the biggest weakness. The job description explicitly requires Convex development skills.
 The CV is in French, which may present a barrier depending on the company's language preferences.
 The CV lacks quantifiable achievements. Adding specific examples of projects and their impact would significantly strengthen the application.

Skills

Angular	
Node.js	
Spring Boot	
SQL/MySQL/PostgreSQL	
MongoDB	
Convex
