

CV Report for Job: Convex Developer

Score: 40/100

Analysis

The candidate demonstrates experience in web development with several internships and freelance work. Their skills in Angular, Node.js, and other frameworks are relevant. However, the CV lacks explicit mention of experience with Convex, which is a critical requirement for the job. The overall score reflects this significant gap.

Insights

Strong experience with Angular and Node.js, demonstrating proficiency in front-end and back-end development.
 Proven ability to work on projects independently as a freelancer and as part of a team during internships.
 Demonstrates a good understanding of project management tools like Jira and Trello.

Weaknesses

No experience with Convex is explicitly mentioned. This is the biggest hurdle for this application.
 The CV is in French, which may present a barrier to some recruiters. An English version is highly recommended.
 The CV lacks quantifiable achievements. Adding specific examples of accomplishments and impact would strengthen the application.
