

CV Report for Job: Software Engineers

Score: 20/100

Analysis

The provided CV is a report of an internship completed in a manufacturing environment (SMT processes at SinerjiNAT). It focuses heavily on manufacturing processes, production lines, and quality control, showcasing skills not directly relevant to a Software Engineer position. There is no mention of programming languages, software development experience, projects, or any other skills typically associated with a software engineering role. Therefore, the candidate's suitability for this position is very low. To improve, the CV needs to be entirely rewritten to focus on software development skills and experience.
